DIGITAL BUS PASS SYSTEM

Abstract

Abstract

Buses are an integral means of public transport in India. In metropolitan cities like Mumbai and Delhi, 10-15 million people travel through public transport buses daily. Today, in the era of Digital India (a campaign launched by the Government of India) and Cashless Economy, public transport needs to adapt the technology advancement. Even though the public transport buses have been providing fairly satisfactory services, there is a need for smart and reliable system.

Digital Bus Pass System is a mobile application which helps the passenger to apply and get digital bus pass and they can choose three different variants of daily, weekly and monthly passes with auto generated QR codes valid for specific periods. This will act as an e-Ticket that will be verified by the bus conductor

Module Description

Module Description

1. User Module:

Register: User can register with all their Personal details.

Login: Registered user can Login with their credentials.

Apply Monthly Bus Pass: User can apply Monthly concession bus pass through Mobile Applications

QR Code: On selection of the Bus Pass, the user can access in Local Buses and Conductor Verifies it.

Feedback: User can give their feedback accordingly.

2. Admin

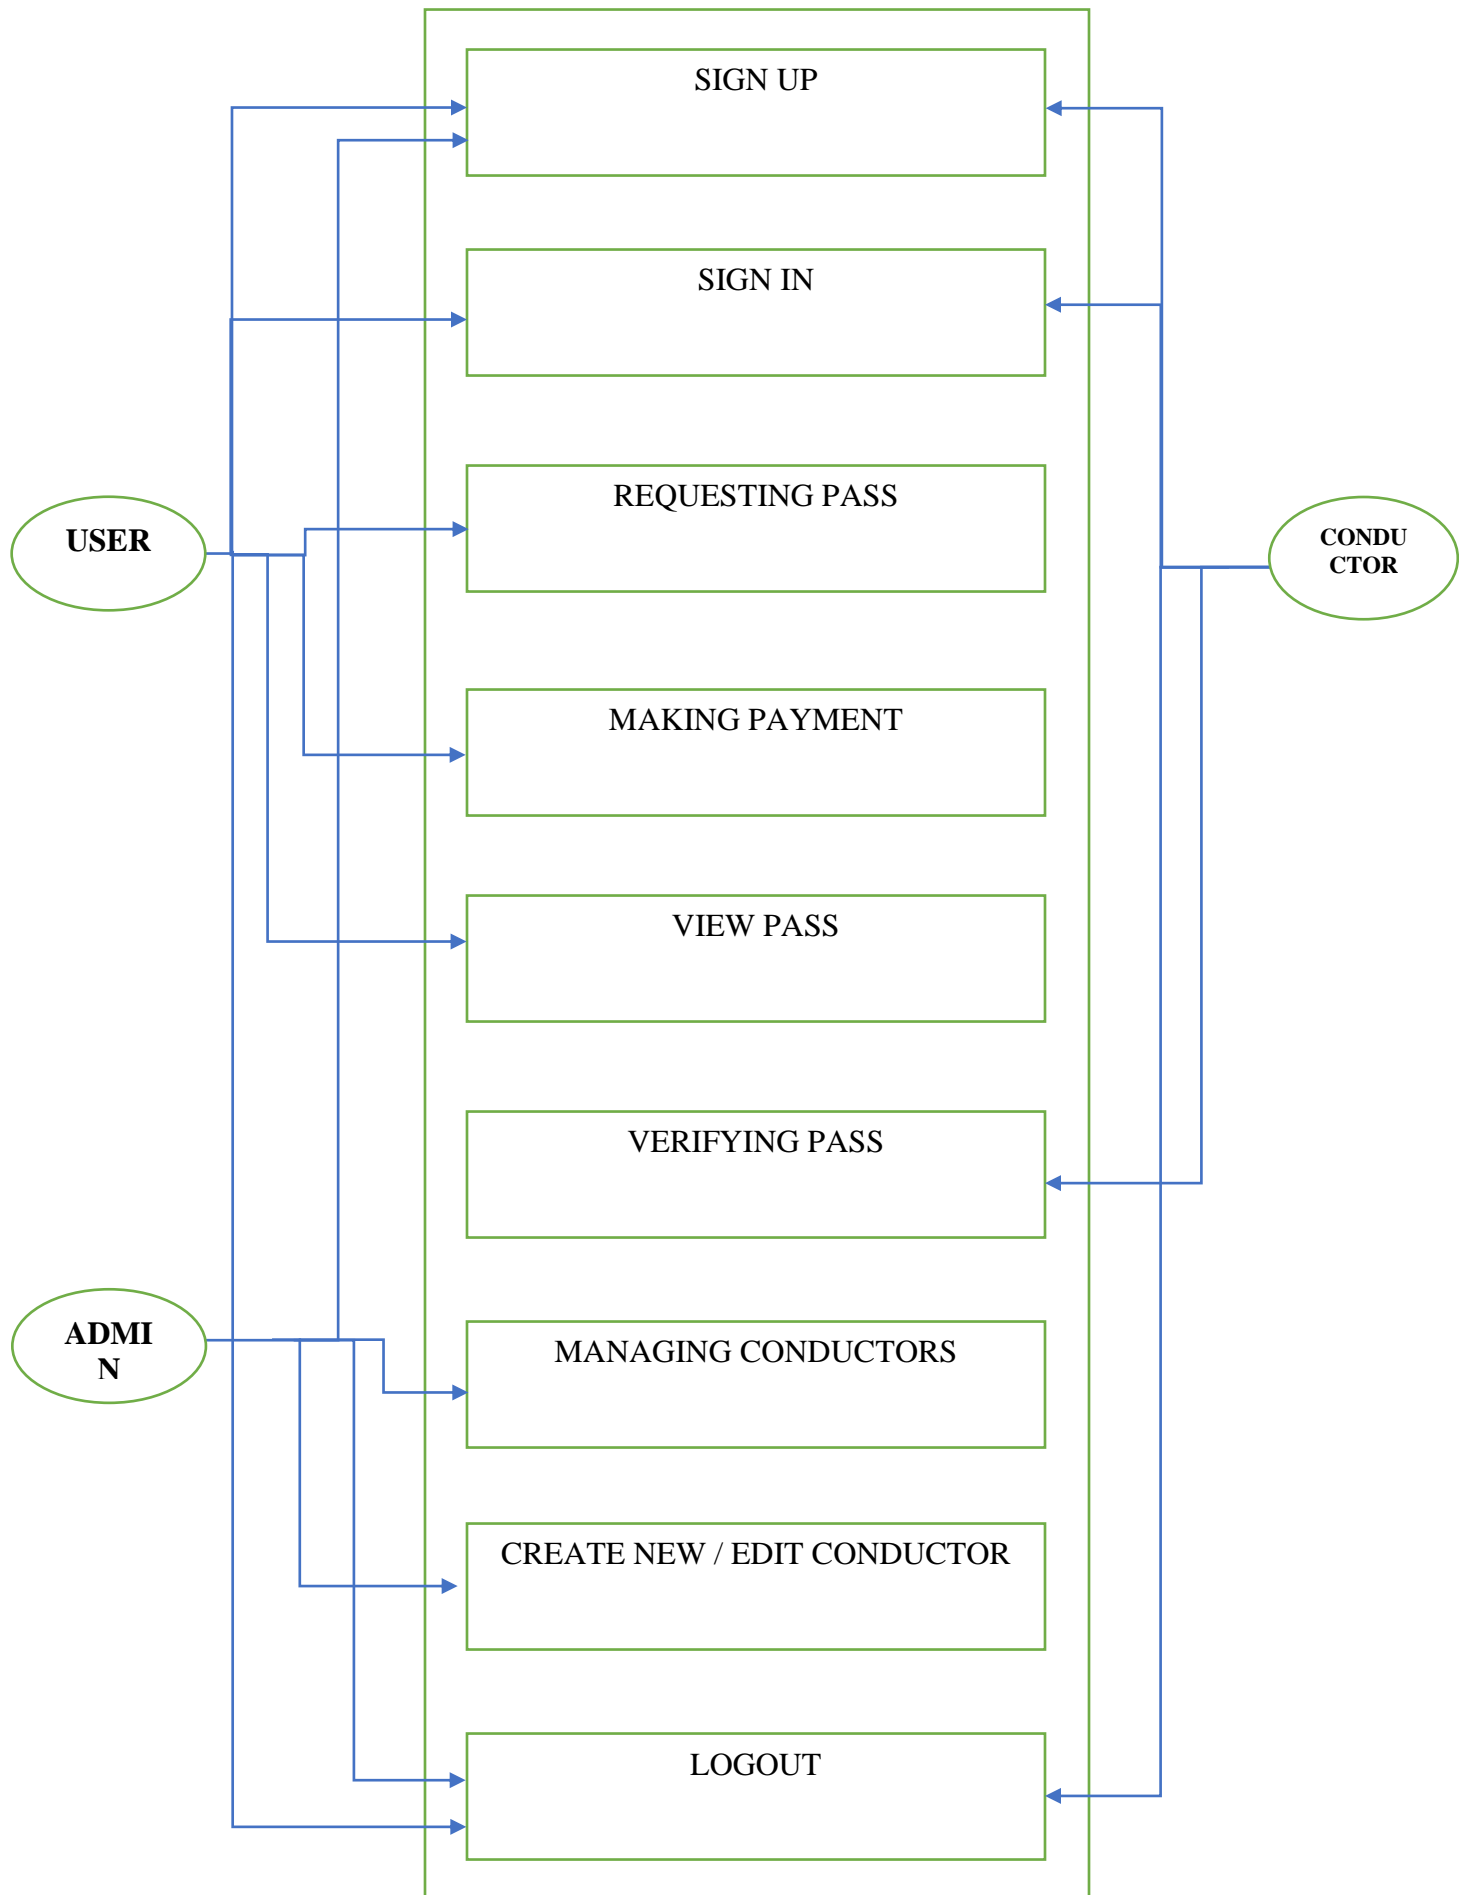

Register: Admin can register with all their Transport Corporation details.

Login: Admin need to login with valid login credentials.

Approval Progress: Monthly Bus Pass can be approved by the Local Transport Officers

Figma

The screenshot displays a Figma workspace for a mobile application titled "DIGITAL BUS PASS SYSTEM". The design is presented in a "Drafts" state. The main canvas shows a series of mobile app screens for an iPhone 11 Pro Max, arranged in a grid. The screens include:

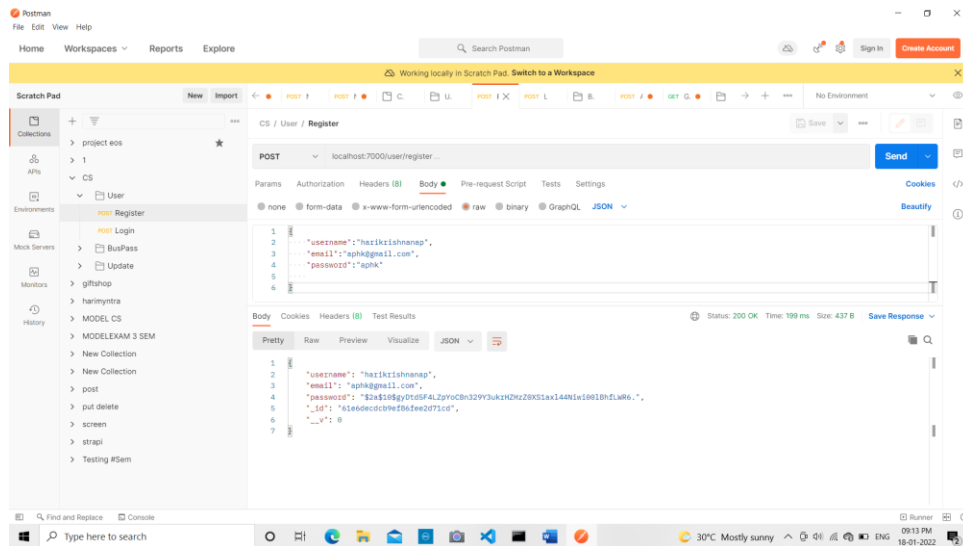

- Registration Flow:** A screen with a globe icon and a "REGISTER" button, followed by a "Login" screen with a "Log In" button.
- Login Flow:** A screen with a "Login With Us!" header, followed by a "Forgot Password" screen with a "Forgot Password" button.
- Pass Management Flow:** A screen with a "Select One" header, followed by a "One-Day Pass" screen with a "Get My Pass" button, and a "Monthly Concurs Pass (Student)" screen with a "Get My Pass" button.
- Pass Management Flow:** A screen with a "Select One" header, followed by a "Monthly Concurs Pass (Student)" screen with a "Get My Pass" button.
- Pass Management Flow:** A screen with a "Select One" header, followed by a "Monthly Concurs Pass (Student)" screen with a "Get My Pass" button.
- Pass Management Flow:** A screen with a "Select One" header, followed by a "Monthly Concurs Pass (Student)" screen with a "Get My Pass" button.
- Pass Management Flow:** A screen with a "Select One" header, followed by a "Monthly Concurs Pass (Student)" screen with a "Get My Pass" button.
- Pass Management Flow:** A screen with a "Select One" header, followed by a "Monthly Concurs Pass (Student)" screen with a "Get My Pass" button.

The right sidebar shows design settings, including a background color of #D902E2, color styles, and grid styles. The top bar indicates the file path and draft status.

Conclusion

CONCLUSIONS:

The package was designed in such a way that future modifications can be done easily.

The following conclusions can be deduced from the development of the project.

- ✓ It effectively overcomes the delay in communications.
- ✓ Updating of information becomes so easier.
- ✓ Mobile security, data security and reliability are the striking features.
- ✓ The Mobile Application has adequate scope for modification in future if it is necessary.

Future Enhancement

Future Enhancement:

This application avoids the manual work and the problems concern with it. It is an easy way to obtain the information regarding the various service information that is present in this project.

The next enhancement that we can add the searching option. We can directly search to the particular Schemes and making payment mode from this Application with Auto Generated QR. These are the two enhancements that we could think of at present.
